Swift 3	AJAX
HTML5	Express
CSS3	SQL
JavaScript	PostgreSQL
jQuery	Git
JSON	Bootstrap
Node.js	Mocha
AngularJS	Google Cloud Vision
RESTful API	CoreData
Knex.js	

SIGNATURE PROJECTS

MaxTrax
Swift 3, Xcode, Google Cloud Vision, Google Places, CoreData, Core Location

AppleFit is a fitness/diet goal iOS application that lets the user input their weight-lifting, running, and dieting goals. CoreData is used to save the user's stats on their phone. Google Cloud Vision is used for object recognition to recognize certain categories of food so they can be properly logged. This application is currently under review in the iTunes App Store.

RunningSocial
Swift 3, Xcode, Apple Maps SDK, Firebase

RunningSocial is an iOS application that lets users log in and create an account so that they can see social runs that have been organized in the local area. Users are able to view the runs on a map and can create their own social runs.

gReads A Lot
HTML5, CSS3, JavaScript, jQuery, JSON, Node.js, Knex.js, AJAX, Express, SQL, PostgreSQL, Bootstrap, Heroku

gReads A Lot is a web application that allows users to interact with a database full of books and authors. Users can search the database as well as create, edit, and remove books and authors.

WORK EXPERIENCE

Sr. Technical Recruiter
Talent Navigation Experts (Denver, CO)
June 2015 - January 2017

Produced over $490,000 in recruitment revenue from June 2015 through end of 2016.

Created interactive candidate and compensation tracking systems in Microsoft Excel to make the recruiting process more efficient and properly focused; brought great clarity to a confusing commission program.

Ski Instructor
Vail Resorts (Beaver Creek, CO)
December 2013 - April 2015

Sergeant, 0352
United States Marine Corps (29 Palms, CA)
March 2008 - January 2012

Awarded the Navy and Marine Corps Achievement Award for designing a mathematical polar plot program in Microsoft Excel to more accurately determine enemies' locations and increase the lethality of the unit.
